Company Profile

Built for American yards, supplied from Kentucky.

United Source Group LLC is a U.S. fencing company based in Jeffersontown, Kentucky. We specialize in wood-plastic composite (WPC) fencing and outdoor decking, and we take care of every step: product supply, design help, measuring, and installation through our network of trusted Preferred Installers.

Our fence boards blend the warm look of wood with the toughness of plastic. They resist water, insects, cracking and fading, and they never need painting or staining.

We serve homeowners, builders and commercial projects with one goal: a fence that looks great, lasts for years and costs little to keep up.

01

Measuring

On-site measuring so every run, corner and gate opening is planned right.

02

Design

Help choosing the style, height and color that fits the property.

03

Supply

Complete fence systems, retail and wholesale, by the piece or as section kits.

04

Installation

Installed by our trusted Preferred Installers, with our support after the sale.

Why co-extruded WPC

A board made to last.

Our boards are co-extruded: a dense wood-plastic core wrapped in a tough ASA outer shell. The core gives strength. The shell protects against water, sun and wear.

Water resistant

A sealed outer shell keeps water out, so boards won't rot, swell or grow mold.

Freeze-thaw stable

Holds its shape through cold winters without cracking or warping.

UV protected

UV stabilizers in the shell help the color resist fading in strong sun.

Real wood-grain look

Embossed wood grain gives the warm look of real wood, without the upkeep.

No splinters

Smooth to the touch and friendly to kids and pets.

Low upkeep

No painting, staining or sealing. Rinse with water to clean.

How it is made

- 1 Raw materials: wood fiber, PE and ASA resin, UV stabilizer, antioxidant, color and compatibilizer
- 2 High-speed mixing
- 3 Extrusion into pellets
- 4 Co-extruded profile: a dense core wrapped in a protective ASA shell
- 5 Cooling and cutting to length
- 6 Surface lamination and wood-grain embossing
- 7 Finished WPC fence board

Fence Styles

All styles: 6' wide sections · one post and rail system

Liberty Privacy

4' · 5' · 6' H

Full privacy. Boards stack edge to edge between a top and bottom rail for a clean, solid wall.

SKU: USG-LBP-4 · USG-LBP-5 · USG-LBP-6

Liberty Shadowline

4' · 5' · 6' H

Full privacy with slim shadow lines between boards for a modern, layered look.

SKU: USG-LBS-4 · USG-LBS-5 · USG-LBS-6

Heritage Privacy

4' · 5' · 6' H

Full privacy with an aluminum center rail that adds a strong horizontal accent.

SKU: USG-HRP-4 · USG-HRP-5 · USG-HRP-6

Heritage Semi-Privacy

4' · 5' · 6' H

Mostly private, with a narrow open gap near the top to let light and air through.

SKU: USG-HRS-4 · USG-HRS-5 · USG-HRS-6

Fence Styles

All styles: 6' wide sections · one post and rail system

Horizon Semi-Privacy 4' · 5' · 6' H

Board groups separated by open gaps. Private enough, with an airy feel.

SKU: USG-HZS-4 · USG-HZS-5 · USG-HZS-6

Garden Trellis 4' · 5' · 6' H

A private lower section topped with open aluminum trellis slats.

SKU: USG-GDT-4 · USG-GDT-5 · USG-GDT-6

Fleur Lattice 4' · 5' · 6' H

Two decorative aluminum fleur-de-lis bands, a nod to Louisville's own symbol.

SKU: USG-FLL-4 · USG-FLL-5 · USG-FLL-6

Ripple Lattice 4' · 5' · 6' H

A privacy panel crowned with a flowing decorative lattice band.

SKU: USG-RPL-4 · USG-RPL-5 · USG-RPL-6

Fence Styles

All styles: 6' wide sections · one post and rail system

Metro Privacy

4' · 5' · 6' H

Wide boards framed by bold aluminum rails for a contemporary look.

SKU: USG-MTP-4 · USG-MTP-5 · USG-MTP-6

Skyline Slat

4' · 5' · 6' H

Evenly spaced horizontal boards for a light, open, modern fence.

SKU: USG-SKS-4 · USG-SKS-5 · USG-SKS-6

Board colors

Coffee

Teak

Black

White

Posts, rails, caps and gate frames are matte black aluminum.
Printed colors are a guide; ask for a sample board.

Standard sizes

4'

tall × 6' wide

5'

tall × 6' wide

6'

tall × 6' wide

Sold per 6-foot section as complete kits or by the piece. Custom heights on request.

Fence Gates

Gates & gate kits

Matte black aluminum gate frames that match every fence style. Each kit includes the frame and all hardware. Choose the infill to match your fence.

4' Single Gate

48" W × 72" H

Walk gate for side yards and paths.

6' Single Gate

72" W × 72" H

Wider opening for mowers and equipment.

12' Double Gate

144" W × 72" H

Two leaves for driveways and vehicle access.

Infill options

Composite boards to match your fence, aluminum tongue-and-groove panels, or aluminum 4" Euro slats with 1" spacing.

Gate posts

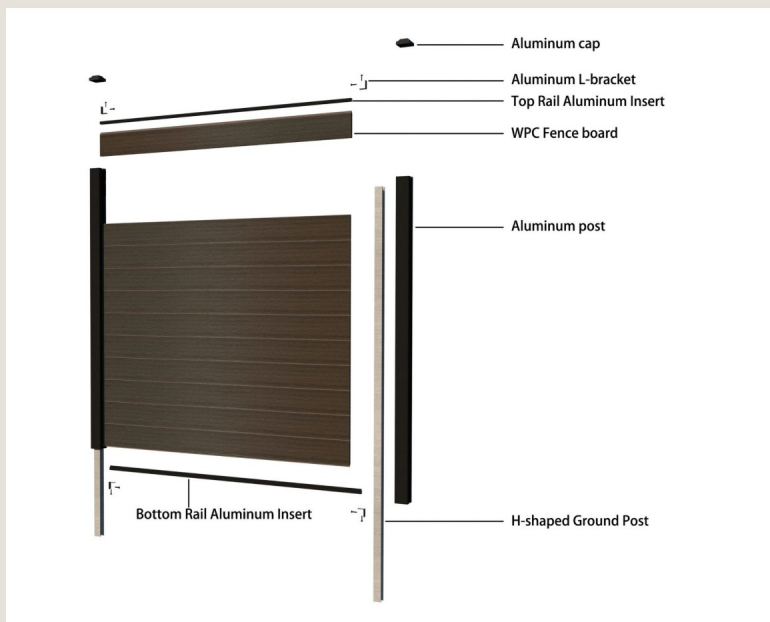

Sold separately: 4" × 4" aluminum gate post (9') or 3.14" × 3.14" gate post (8'), both with caps.

Fence System

How the fence goes together.

Every United Source fence uses the same modular parts. Boards slide into the aluminum posts, rails lock them in place, and caps finish the top.

Need a corner at an odd angle? The Multi-Angle Swivel Kit lets a run turn to almost any angle.

Aluminum post

Bottom Rail Aluminum Insert

Top Rail Aluminum Insert

H-shaped Ground Post

Aluminum Cap

Aluminum L-bracket

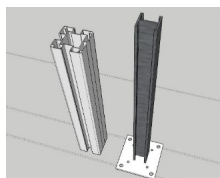

WPC Fence board

Side Post Cover

Snaps over unused post slots for a clean finish.

Steel Base Plate

Mounts a line post to concrete. No digging.

2.5" Black Screws

Self-drilling, self-tapping, hex head with washer.

2" Aluminum Spacer

Creates the open gaps in semi-privacy styles.

Installation Methods

Two ways to set the posts.

Plan A • i-Post™ Driven System

No concrete. Fast and clean.

1 Drive the aluminum H-post about 39" (1 m) into the ground with a post driver.

2 Slide the aluminum fence post over the H-post and secure it with screws.

Plan B • Concrete-Set Post

Classic method for any soil.

1 Dig a hole about 8" wide. Go below your local frost line.

2 Set the aluminum post in the hole and fill with concrete. Let it cure.

Then, for both methods

3 Set the bottom rail insert and fasten it with L-brackets and screws.

4 Slide the WPC boards into the posts one by one.

5 Set the top rail insert and fasten it with L-brackets and screws.

6 Press the aluminum cap onto each post. Done.

Before you dig: call 811 to mark underground utilities, check your local fence code and permit rules, and set concrete posts below the frost line (often 24–30" in Kentucky).
